ICE PRINCESS

BY MARCO MEDRANO

The holidays—and all its pomp and circumstance—are upon us and looking great is *everything*. This is the season to let your inner (ice) princess out for a spell and that begins by hydrating your skin, hands and hair. The winter chill is a monster for anti-aging enthusiasts. Don't I know it.

As the sporting world turns its focus to the Winter Olympics in a couple of months, you, too, should go for the gold—**Omorovicza**. The

core of this brand's philosophy is something called Hydro Mineral Transference. Essentially, it's Hungarian cures that transform ancient healing mineral waters, science and dermal penetration that empowers genuine healing. Can't get to Omorovicza's renowned medieval Racz Spa springs? Then use its **Deep Cleansing Mask** or unique **Thermal Cleansing Balm** with Moor mud, sweet almond oil and orange blossom. Then tone or refresh throughout the day with **Queen of Hungary Mist**. The company's **Copper Peel** is a foaming two-phase peel (truly awesome), combining a blue copper paste and a lactic acid

activator. The entire moisturizer line is top shelf, but **Instant Plumping Cream** provides overnight success—literally. omorovicza.com; Neiman Marcus, The Mall at Short Hills

The Aussies have done it again. If you like your existing skincare brand, yet want to seriously amplify your results, then **ASAP Skincare** can show you the actual vitamin ABCs of it. Be your own mixologist to attack specific spots, lines and sagging with ASAP's full-strength serums (A+B+C) and hydrators—the range is concise. skinstore.com ✓
